PROFESSIONAL SUMMARY

Frontend Developer (Angular) with 3+ years of experience building scalable, high-performance Single Page Applications (SPA) and enterprise-grade web applications using Angular (v15–v20), TypeScript, and RxJS. Strong expertise in reactive programming, component-based architecture, performance optimization, and REST API integration. Experienced in developing reusable UI components, implementing Angular Signals, lazy loading, i18n, and RTL support to deliver responsive and user-friendly applications. Proven track record of improving application performance by 40% and delivering solutions for 50,000+ users. Adept in Agile environments with strong problem-solving, communication, and collaboration skills.

TECHNICAL SKILLS

Frontend: Angular (v15–v20), TypeScript, JavaScript (ES6+), RxJS, Angular Signals, Angular Material, SCSS, HTML5, CSS3, Bootstrap, Standalone Components, Reactive Forms, Lazy Loading, OnPush Change Detection, i18n, RTL Support

State Management: RxJS Operators (combineLatest, switchMap, debounceTime, forkJoin), BehaviorSubject, Subject

Testing: Vitest, Jasmine, Karma, Unit Testing, Component Testing, Isolated Service Testing

Backend (Working Knowledge): Java, Spring Boot, RESTful APIs, Hibernate, JPA, MySQL, Oracle Database

Tools and Workflow: Git, GitHub, Bitbucket, Postman, Jira, Azure Bastion, Agile Scrum

WORK EXPERIENCE

Software Engineer

iHxCloud Pvt. Ltd

Apr 2025 – Present

Bangalore, India

- Architect and develop enterprise-grade Angular applications serving 50,000 plus users, maintaining 99.9% production uptime.
- Implement reactive state management using RxJS BehaviorSubjects and Angular Signals, reducing change detection cycles by 35% and improving UI responsiveness.
- Integrate REST API consumption from Spring Boot microservices using Angular HTTP Client and interceptors for consistent error handling and token management.
- Conduct code reviews on advanced Angular patterns including standalone components, signals, and reactive forms.
- Write unit and component tests using Jasmine and Karma, maintaining test coverage across critical application modules.

Associate Software Engineer

iHxCloud Pvt. Ltd

Mar 2023 – Mar 2025

Bangalore, India

- Improved frontend load time by 40% through RxJS operator refactoring, route-based lazy loading, and OnPush change detection strategy.
- Built a reusable Angular Material UI component library with 30 plus components, reducing development effort by 25% and ensuring design consistency.
- Integrated REST APIs from Java Spring Boot backend for policy management modules with robust error states, retry logic, and loading indicators.
- Implemented Angular i18n with full RTL layout support, enabling bilingual Arabic and English interfaces for government clients.

- Promoted to Software Engineer within 2 years based on consistent technical delivery and stakeholder communication.

PROJECTS

Qatar Health Insurance System (QHIS)

Oct 2023 – Mar 2025

- Developed a national-scale healthcare insurance platform as the primary Angular frontend developer, serving 50,000 plus end users.
- Completed 7-month onsite deployment in Qatar, collaborating directly with MOPH government stakeholders for requirements gathering and feature demonstrations.
- Built bilingual Angular application (Arabic/English) with Angular i18n and full RTL layout, supporting both LTR and RTL simultaneously.
- Implemented complex reactive workflows using RxJS operators (combineLatest, switchMap, debounceTime) and Angular Signals for real-time policy and claim status updates.
- Consumed secure backend APIs built on Spring Boot, Hibernate, JPA, and Oracle Database for user management, policy workflows, and claims transactions via Angular HTTP Client with authentication interceptors.

QuadraCyte – Healthcare Management System

Feb 2024 – Present

- Drove migration of a legacy jQuery portal to modern Angular using standalone components, lazy-loaded modules, and integrated Vitest for isolated unit testing.
- Engineered 30 plus reusable Angular Material components and optimized API call patterns using RxJS caching strategies (shareReplay, distinctUntilChanged), reducing redundant requests by 40%.
- Defined REST API contracts with Java backend developers on Spring Boot endpoints, JPA entities, and MySQL schema for type-safe frontend integration.

EDUCATION

B.Sc. Computer Science

Nazareth Margoschis College, Tamil Nadu

July 2019 – May 2022

GPA: 91.3%

CERTIFICATIONS

- Angular (Intermediate) – HackerRank Certified

[View Certificate](#)

ACHIEVEMENTS

- Recognized by MOPH Qatar client for technical excellence and on-time delivery during critical national platform milestones.
- Mentored 2 junior Angular developers on component architecture, RxJS patterns, and Agile best practices, accelerating onboarding by 30%.
- Selected for international onsite deployment based on Angular proficiency and stakeholder communication skills.
